

## CS 6780 midterm survey

1. What do you think of the lectures? (E.g., clarity, pace, would you like to see more/less detail, anything you can think of.)

2. What's your favorite part of this class?

3. What's your least favorite part of this class? Anything that you'd like us to do differently?

4. What do you think of the homeworks (both written and programming parts)? Useful for learning the material?

5. What do you think of Prof. Saxena's way of instruction?

6. Any other comments or suggestions regarding the class? Or any other messages that you'd like to pass on to either Prof. Saxena or one of the TAs?

We take all student feedback very seriously. Thanks very much for filling this out!
