

Name:

Netid:

Below are rankings given by 3 systems for a query q .
First 5 results are shown to the user.

Sys 1	Sys 2	Sys 3
#	#	A
#	A	#
A	#	#
B	#	#
#	B	#

----- (results below are not shown to the user)

#	#	#
C	C	C
#	#	B

[everything else below is #]

Relevant documents $REL_q = \{A, B, C\}$

Non relevant documents are marked by “#”

a) Which of the three systems you, as a user, would prefer?

b) Describe properties that make you prefer one system over the other. What makes one system “better” than the other?
