

<p>CS 482 Summer 2004 Prelim 1 Review Suggestions</p>
--

Suggested Review Questions

The following are a few questions we recommend for review. They are neither sufficient nor necessary for studying for the prelim. We won't be posting solutions for these problems, but you are more than welcome to drop by office hours or the review session to ask about them. You can also ask us about any other question in the text (of which there are muchos *many*) and we can help you out.

Matchings Ch. 1 Qn. 2

General Graphs Ch. 3 Qn. 5 [*Note*: this is hard unless you've read parts of Ch. 2]

Greedy Ch. 4 Qn. 8

Divide & Conquer read Ch. 6 section 2, and understand how the solution works.

Dynamic Programming Ch. 5 Qn. 11

Review Session

We'll hold a review session on Sunday night, 5-6pm, -ish. The room will be Upson 215.

The review session will be for you to ask questions. In particular, we're not going to prepare any sort of review material, so please come armed with questions.

And last but not least, *be on time* and GOOD LUCK!
