Lecture 2:

Nature of Games

Brainstorming Exercise

Definitions of Games

- Adams: Fundamentals of Game Design

 A game is a form of interactive entertainment where players must overcome challenges, by taking actions that are governed by rules, in order to meet a victory condition.
- Salen & Zimmerman: *Rules of Play*A **game** is a *system* in which *players* engage in *artificial conflict*, defined by *rules*, that results in a *quantifiable outcome*.

Design Decisions

Players

- How many players are there at a time?
- Who or what is the player in the world?
- Specifies a notion of *identity*

Goals

- What is the player trying to achieve?
- Defined by the game or by the player?
- Specifies the player focus

Design Decisions

Rules

- How does the player effect the world?
- How does the player learn the rules?
- Specifies the *boundaries* of the game

Challenges

- What obstacles must the player overcome?
- Is there more than one way to overcome them?
- Specifies the fundamental *gameplay*

(Other) Design Decisions

Game Modes

- How are the challenges put together?
- What is the interaction *context*?

Setting

- What is the nature of the *game world*?
- What is the *perspective* (e.g. side-scroller, 3D, etc.)?

Story

- What *narrative* will the player experience?
- How is it connected to gameplay?

Play Length

- How short a game can I play and have fun?
 - Least meaningful unit of play
 - Console: 30 minutes+ is acceptable
 - Mobile: No more than a minute
- Casual often means short play units
 - But can have sophisticated gameplay!
 - Example: Plants vs. Zombies
- But casual vs core is a bad distinction

Dueling Design Philosophies

Narrative

- Games are a *story medium*
 - Focuses on storytelling
 - Traditional narrative structure
- Advantages:
 - Emotionally compelling
 - Strong artistic vision
- Disadvantages:
 - Author *voice* over player voice
 - Poorly defined mechanics

Ludic

- Games are about mechanics
 - Focus on gameplay, rules
 - Storytelling is minimal
- Advantages:
 - Focus on player *agency*
 - Tight, well-defined gameplay
- Disadvantages:
 - Lack of player motivation
 - Hard to distinguish yourself

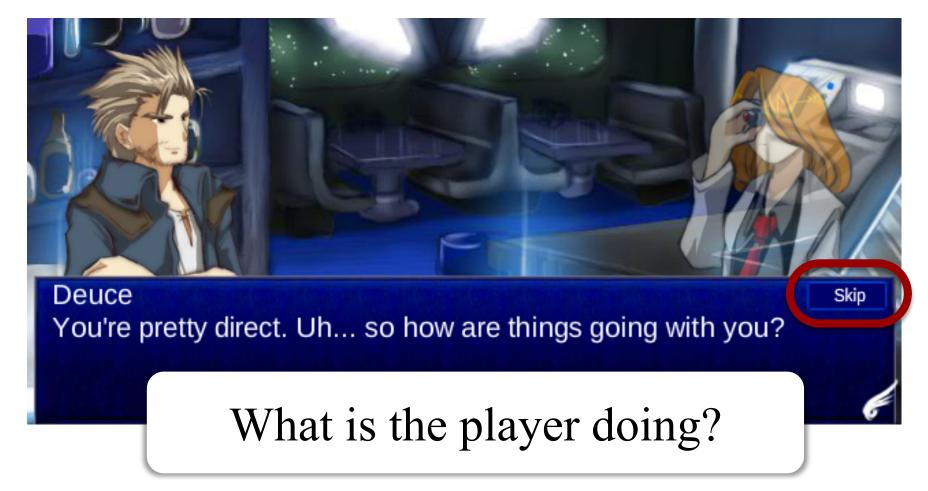

The Dangers of Pure Story

But Ludic is Not Everything

But Ludic is Not Everything

Game Design Must Be a Balance

Motivate the Player

- Needs a story framework
 - Setting to work within
 - Strong sense of identity
 - Challenges with context

Empower the Player

- Drama from player actions
 - Define what the player can do
 - Challenges reward or punish
 - Freedom in achieving goals

Games are **dramatic**, but they have their own **conventions**.

But This Course Will Be Ludic-Centric

- Will focus on design tools
 - Techniques that we can train
 - Using them requires practice
 - Implementing them has technical challenges
- But design is much more
 - You use tools to create art
 - Can only learn by doing
 - With critiques from us
 - Like a studio course
- Keeping balance is up to you

The Adams Approach

- Games as wish-fulfillment
 - I want to _____
- Questions to answer:
 - What dream are you satisfying?
 - What *goals* does this dream create?
 - What *actions* achieve those goals?
 - What *setting* does this dream create?
 - What is the appropriate *interface*?
- Use this to define gameplay

Exploring Gameplay

- To design games, you must play games!
 - Experience many different types of gameplay
 - Do not play the same type of game all the time
- Flash portals are still a good resource
 - Games are small but focus entirely on gameplay
 - Kongregate & Armor Games are some of the best
 - Puzzle game? Look at Kongregate first
- This is how we will use **Piazza** this semester

Have Realistic Goals

- Goal: Size of a indie mobile game
 - Can be played instantly with minimal tutorial
 - A few core mechanics with some variation
- Quality over Quantity
 - Ten amazing levels > 30 poor levels
 - Balance number of challenges with level size
 - Avoid feature bloat (e.g. power ups)
- We will give you constant feedback on this

Commercial Examples

- Braid: Puzzle platformer with time-travel mechanics
- Limbo: Dark platformer with realistic physics
- Hotline Miami: Top-down stealth and action
- Clash of Heroes: Match 3 + Turn-based strategy
- Guild of Dungeoneering: RPG + CCG
 - Use cards to build the dungeon that you explore
- Monument Valley: Puzzle-based exploration
- Think indie games, not boxed retail

Examples from Previous Semesters

- Mount Sputnick (Spring 2017):
 - Competitive rock-climbing game
- Arc en Ciel (Spring 2015):
 - Platformer where you paint platforms, while enemy erases
- **Dash** (Spring 2014):
 - Action game with dash mechanics to avoid enemies, obstacles
- Exodus Protocol (Spring 2013):
 - X-Com style strategy game with only three units
- **Ensembler** (Fall 2011):
 - Classical music rhythm game with you as conductor
