

HW for 2019-12-03

(due: 2019-12-08)

Just fill in the course evaluation! The grading rubric has room for nine HW assignments — finishing the course eval counts toward your participation score. Note that I can see whether you completed the evaluation or not, but nothing about what the evaluation contains.

The university likes to see general participation in course evaluations. But I'd also be happy to get an email with comments about things that you liked or disliked about the course (or things that you think might be done better next time around).

Now is also a good time to send me email with anything you'd particularly like to hear about in the review lecture next Friday.
