

Topic(s): Relevance feedback methods.

Authors: Asif-ul Haque and Benyah Shaparenko (first guide); Victoria Krafft and Ari Rabkin (second guide).

Update 6/12/05: In page 3 of Krafft/Rabkin, the sentence beginning under equation two should read, "This is saying that the relative difference between the probability of a given term appearing in a relevant document and that term appearing in a general document is smaller for v than for v' , but the absolute difference is bigger".
