

Software Engineer

Location: Mountain View, CA

Sportvision, Inc. is the nation's premier innovator of sports and entertainment products for fans, media and marketers. A privately held corporation, Sportvision solutions have enhanced experiences for fans and marketing partners. Our clients include ESPN, Turner Networks, Fox Networks, Major League Baseball, NASCAR, PGA Tour Golf, NFL, etc. The company has captured eight Emmy Awards for our products, five for our signature broadcast enhancements, the virtual yellow 1st and Ten™ line, K Zone, StroMotion™, TOURCast, and three for our pioneering advanced media work with NASCAR.

We have an entrepreneurial culture, which values innovation, creativity, and fun! We are hiring well-rounded Software Engineers with a proven track record in creating and deploying robust, highly visible software. Enthusiasm for solving interesting and complex problems a MUST.

As Software Engineer, you will have the opportunity to work in a small team on a variety of different sports. You'll be responsible for developing software for real time television sports broadcast enhancements. There will be a wide variety of projects, including user interface development, video image processing and television broadcast field tests and operations. You will work on a variety of platforms and with a variety of special purpose hardware.

Job Requirements:

- BS/MS in Computer Science, Engineering, Mathematics, or equivalent
- Knowledge of C++ Language
- Must possess excellent interpersonal, communication, attention-to-detail, problem-solving skills and work well in a team environment
- Must be willing to travel 5 – 20% to sporting events

Experience in these areas are a PLUS:

- Proven experience in Object-Oriented programming
- Strong background in Data Structures
- Windows MFC experience
- OpenGL, Linux and Broadcast video experience
- Working knowledge in Java
- Interest in and knowledge of sports

Candidate will build and strengthen a broad array of skills, including:

- Develop analytical, problem solving and mathematical skills
- Develop an understanding of the sports and sports broadcast video technology
- Design complex, dynamic software programs that are seen on National Television

We offer a competitive compensation package, casual environment and an excellent benefit program.

For consideration, please submit a resume, including salary requirements to careers@sportvision.com.

Equal Opportunity Employer.
