# Final Project Report Guidelines

**Due: December 8, 11:59pm on CMS**

---

## Format

The report will follow a EMNLP short paper submission guidelines: four (4) pages of content and 2 pages for references. The report should follow the ACL two-column format. Please use the official EMNLP 2016 style files for the paper and ensure that your paper setting is US-Letter size (8.5"x11") (if using LaTeX, make sure that your master document class is set to

```
\documentclass[11pt,letterpaper]{article}
```

Submission templates are available from the links below:

- Templates for LaTeX:
  - [emnlp2016-tex.tar.gz](#)
  - [emnlp2016-tex.zip](#)
- Template on Overleaf: <https://www.overleaf.com/latex/templates/emnlp-2016-publication-template/sgxjnwjydmkg#.VwvvHhIrJYg>

---

## Content

This is a short report, so organize your content well. It is recommended to fashion your report after good short papers submitted to ACL/NAACL/EMNLP. There are plenty of excellent examples!

It is recommended to include at least all the following in your report:

- Introduction, including problem definition and motivation
- Examples, examples, examples!
- Related work
- Technical background, if required (No, you don't need to introduce SVM or Back-prop)
- Formal well-motivated description of your approach
- Experimental setup
- Results
- Error analysis
