415: Environmental Interventions - Homework 9
Due: Nov. 27

Goal:
- To prepare for the final project workshop

1. Starting discussions
(1 paragraph) Given the environmental costs of IT documented in the readings, do you believe that IT-based environmental interventions are justified? Why or why not?

2. Project workshop preparation
In the next class, your groups will be presenting the current state of your final project to the class and getting feedback from your classmates. In this homework, you will develop your own ideas about how your project should be presented. In class, you'll have a chance to merge these ideas with your teammates' to develop your presentation.

2a. (1 sentence) Describe the idea of your final project, in a nutshell.
2b. (About one page) Outline the current state of the project, from your perspective. What has been done? What is still left to do?
2c. (A sentence or two) What do you believe is the most exciting thing your group has done so far?
2d. (A few sentences) What is the biggest challenge you believe still faces your group?
2e. List 3 questions that you would like to ask the full class in order to help you in the final stages of your project.
