

## **415: Environmental Interventions - Homework 5**

**Due: Oct 16.**

Goals:

- To examine arts strategies for supporting interventions
- To practice design as a critical mode

### **1. Starting discussions**

Answers to these questions do not need to be in the form of polished writing. The goal is to get you thinking about the issues we'll be discussing in this course. Bring your answers in written form to class for discussion.

1a. (1 paragraph) Describe in your own words one strategy for critical intervention you find compelling that you have gleaned from the readings this week.

1b. (1½ pages) Consider the issues you discussed in your short essay. Invent and describe one or more interventions that might be appropriate for those issues based on the strategy you described in 1a, and explain the extent to which you believe that intervention would be effective in addressing the issues you identified in the short essay. You can choose to either include several interventions with less description, or just describe one intervention and flesh it out more. You may find it helpful to include images, sketches, etc. in your response. Note: no drawing skills necessary (stick figures are A-OK).

*Remember your weekly post to the wiki is due Friday, Oct. 12 and your weekly comment is due by Tuesday, Oct 16 before class. If you did not post a post/comment this past week, you can catch up by making an extra post and comment before Fall Break.*
