A - Biggifier
B - DVS
C - Improving Adaptivity in Mobile File Systems
D - Using Genetic Algorithms to Design and Control Self-Replicating Machines
E - A Space-Optimized Java Virtual Machine for Resource COnstrained Mobile Nodes
F - CUAUV: Autonomous Underwater Project
G - Hardware Acceleration of the Edge-and-Point System for Interactive Rendering
H - Signature Based Authentication
I - Text-Retrieval & The Secrets of the Dead Sea Scrolls
J - A Reliable Fault-Tolerant Airline Reservation System
K - Cougar Project
L - FIRST Robotics
M - High Performance DataDissemination
N - SAML
O - Secure Routing for Mobile Ad Hoc Networks
P - Investigating Models for Translucent Materials with Rough Surfaces
Q - A Static Buffer Overrun Detector for C
R - ASTRO
