Max Planck Institute SWS

"I only sniffed his ass to be polite."

"We are sorry to inform you that submission nr. 100 was not selected by the program committee to appear at Conference X. [...] Due to time and space limitations, we could only choose a small number of the submitted papers to appear on the program."

"Your submission was not accepted at Conference X."

"We are sorry to inform you that submission nr. 100 was not selected by the program committee to appear at Conference X. [...] Due to time and space limitations, we could only choose a small number of the submitted papers to appear on the program."

Politeness

- › important force shaping our language
- › essential for NL understanding

Politeness

- › important force shaping our language
- › essential for NL understanding

This work:

a computational approach to politeness

- › Detect and measure politeness (& rudeness)
- › Refine sociolinguistic theories of politeness
- › Relation between politeness and social factors

But what is politeness?

Politeness is subtle, far beyond "Please" and "Thanks"

But what is politeness?

Politeness is subtle, far beyond "Please" and "Thanks"

Option 1: "Do you have any code that we can look at?"

Option 2: "Any code? Or do I have to guess at how you did it?"
