

# CS Undergraduate Townhall Meeting

Monday, Oct 18, 5:30pm-6:00pm, Upson 111

Inviting all students interested in CS (affiliated or not).

There will be **snacks**. Agenda:

- 1) **Remodeling the undergrad labs**: Lockheed Martin made a generous gift for these purposes. We would like to gather ideas on what the new lab should look like.
- 2) **1 or 2-Credit Programming Courses**: We are offering various one or two credit courses for specific programming languages (e.g. CS2024 C++, CS2042 Unix, CS2046 Android). We are considering changing the set of topics, and would like comments on what the right set should be.
- 3) **General discussion about the CS major**. We'd like to hear from you!

Before the townhall meeting, starting at 5pm, Prof. Joachims will talk about his research on machine learning from clickthrough data in search engines.
