

File drawers & folders Classes & objects

Each folder in drawer *Patient* contains the same kind of information.

class ← file drawer
manila folder ← object → instance

CS101J, Cornell 0

Format of a manila folder

field ← variable in a folder
class ← file drawer
manila folder ← object → instance

CS101J, Cornell 1

The name on the tab can be any name

When you draw a folder, put any name you want here, as long as each folder has a unique name.

field ← variable in a folder
class ← file drawer
manila folder ← object → instance

CS101J, Cornell 2
