

CS 3110 Fall 2019: The One-Page Summary

Course website:

- <https://www.cs.cornell.edu/courses/cs3110/2019fa/>
- All materials posted there: syllabus, readings, assignments, etc.

Lectures: TR 10:10-11:00 am

- Attendance measured by iClicker.
- Center seating area, from front to back, is a laptop-free zone. Tablets okay if flat and notifications disabled.
- Readings linked for each lecture are the primary content of the course; slides are just a summary.
- Recommended but optional homework (and solutions) provided in repo.

Discussion sections: mostly MW, some TR.

- Check Student Center directly (not Scheduler or other apps) for your exact section location.
- Attendance: strongly encouraged but not required. Come because you want to be there.

Assignments:

- Weekly programming assignments: individual at first, later partners recommended (your choice).
- Team project in second half of semester: 3 members of your choice, must be within section for sake of meetings and demos.
- Reflections: read *Pragmatic Programmer* and reflect on how it applies to your coding experience in 3110.

Workload:

- 4-credit core class for majors/minors.
- Expect to write way more code than in 2110; plan your schedule accordingly.
- Last 5% of each programming assignment is for those who want to dig deep.

Office hours: See website for when and where.

Communication:

- Your primary point of contact is your section TA.
- Please use Campuswire, not email, when possible.

Your TODO list before Tuesday:

1. Read material linked on website for today: syllabus and textbook chapter.
2. Buy an iClicker.
3. Install OCaml: follow instructions linked on website.
