CS 4701:
Practicum in
Artificial Intelligence

Fall 2017
Instructor: Prof. Haym Hirsh

Course Project Details

- ONE semester-long project

- Teams of 2

- Can be based on AI knowledge acquired in one of our other AI courses. All team members should have taken that course.

- Project can build off of other work, but
  - That must be disclosed
  - All involved must agree to it
  - The course project itself must be distinct work for this course

Course Project Details

- Focus is on AI content – don't get sucked into UI development, server software, etc.

- Must consider evaluation

- Milestones:
  - Team formation
  - Course proposal (may require revision)
  - Project update
  - Final project report/presentation – TBD
