

The Global Innovation Index 2017

THE GLOBAL INNOVATION INDEX (GII)

The **Global Innovation Index (GII)** is the premier reference for measuring a country's innovation performance. Now in its 10th edition, the GII has evolved into a valuable benchmarking tool that can facilitate public-private dialogue, through which policy makers, business leaders, and other stakeholders can evaluate progress on a continual basis.

Innovation is firmly recognized as a central driver of economic growth and development. Co-published by **Cornell University**, **INSEAD**, and the **World Intellectual Property Organization (WIPO)**—a specialized agency of the United Nations), the GII acts as a source of insight into the multidimensional facets of such innovation-driven growth. In 2017, our Knowledge Partners are the **Confederation of Indian Industry (CII)**, **PwC and Strategy&**, and the **National Industry Confederation (CNI)** and **Brazilian Service of Support to Micro and Small Enterprises (Sebrae)**.

The GII provides detailed metrics on **81 indicators** for more than **127 economies**, which represent 92.5% of the world's population and 97.6% of global GDP. Extending beyond the traditional measures of innovation such as measures of research and development, the index explores a broad horizontal vision of innovation that encompasses indicators of political environment, education, infrastructure, and business sophistication.

Over the last 10 years, the GII has established itself as a **central policy tool for innovation** around the world, creating a deeper understanding of essential ingredients for holistic innovation policy that help promote economic growth and development. **Top government officials and ministers** have mentioned GII in their key public addresses. Some of the prominent leaders mentioning GII include, but not limited to, Chinese Premier Li Keqiang, Indian Prime Minister Narendra Modi and Swedish Prime Minister Stefan Löfven.

The GII is equally well received in the industry and media. Since the launch of 10th edition of GII in 2017, the report has been mentioned in over 6,300 media articles and discussed at various high-level policy events around the world. To know more about GII please visit our website:
