

At each trial, you will be looking at three images of a standing angel, like in the following example:

Left

Middle

Right

1. The angels all have the same shape and are rendered using the same lighting. They only differ in their material properties.
2. The face of each angel is masked. Please ignore the face in your judgments.
3. You will judge whether the middle angel is more similar to the left angel or the right angel.
4. Press "q" to select left and middle, or "p" for right and middle.
5. You can take as much time as you need to make each judgement. We expect that on average each triplet will take a few seconds. Once you make your choice, the next trial will automatically start.
6. We have divided the experiment into blocks, where each block has 100 trials. You are welcome to take a break between blocks.
